Foreword

Crime in South Dakota is an annual publication based upon Uniform Crime Reporting (UCR) statistics. The UCR program is the basis for collecting data on selected crimes by participating agencies throughout South Dakota. Prior to 1990, this data collection effort was handled directly by the FBI with approximately thirty-two agencies reporting in 1989. On January 1, 1990, the Criminal Statistical Analysis Center became the State Clearinghouse for UCR data. Eighty-two agencies, covering approximately 85% of the state's population, submitted reports. In 1991, 14 new agencies joined the Uniform Crime Reporting Program. These additional agencies resulted in a submission of data from fifty-four Sheriffs' Offices and forty-two Police Departments for a total of ninety-six agencies covering approximately ninety percent of the population. This represents an increase of five percent of the State's population covered by UCR.

I'd like to take this opportunity to recognize the many individuals involved with this project for their participation and cooperation. The Uniform Crime Reporting Program is strictly a voluntary program and without the assistance of these local agencies, the following crime data would be unavailable.

Mark Barnett
South Dakota Attorney General

Introduction

Uniform Crime Reporting (UCR) is a cooperative effort among city, county and State law enforcement agencies. The State Clearinghouse for UCR provides participating agencies with the necessary supplies required for Uniform Crime Reporting. Reports are completed and forwarded to the State Clearinghouse on a monthly basis. The Clearinghouse then reconciles all reports and submits them to the FBI, where national reports such as Crime in the U.S. are generated.

Certain constraints should be noted in interpreting the collective data for the State. The data included in this publication are based solely on actual figures, not estimated figures, from reports submitted by participating Sheriffs' Offices and Police Departments. These figures cannot be compared to 1990 data because of the difference in the number of reporting agencies, nor can these figures be compared to data released by the FBI, as the FBI estimates for non-reported data.

The population figures included in this publication were obtained from the South Dakota Data Center, University of South Dakota. These figures are currently the most accurate available. The information included in this report was generated by a combination of these population figures and the Uniform Crime Reporting Data collected from the participating agencies.

The statistics were analyzed for a twelve month period beginning January 1, 1991. However, the following agencies did not report for an entire twelve month period.

AGENCY	REPORTED FOR:
Codington County Sheriff's Office	January through June
Hamlin County Sheriff's Office	January through May
Milbank Police Department	January through June

The information in this publication will reflect this partial participation. The data included in this report can only be as accurate as the data provided by each reporting agency. These figures are based on data received on or before May 31, 1992.

Please direct any questions or comments you may have to Anita Oehlerking, 773-6310, or Halley Lee, 773-6312.

CRIME RATES PER 100,000 POPULATION

CALCULATION OF CRIME RATES:

One of the most meaningful crime statistics used in Uniform Crime Reporting is the Crime Rate. This rate is the number of offenses per 100,000 inhabitants. This rate can be calculated regardless of the number of inhabitants in a city or county. To compute rates, divide the city's population by 100,000 and divided the number of offenses in each class by that answer. The answer is the number of offenses per 100,000 inhabitants and is your crime rate for that offense.

EXAMPLE:

A. Population for jurisdiction - 75,000
B. Number of Burglaries for that jurisdiction - 200

Divide 75,000 by 100,000 = 0.75000
Divide 200 by 0.75000 = 266.67

The Crime Rate for Burglary in that jurisdiction is 266.67 per 100,000 inhabitants.

Murder

MURDER AND NONNEGLIGENT MANSLAUGHTER:

The willful killing of one human being by another. Any death due to injuries received in a fight, argument, quarrel, assault, or commission of a crime is counted as a Homicide. Suicides, accidental deaths, assaults to murder, traffic fatalities, and attempted murders are not classified as murder and nonnegligent manslaughter.

In 1991, there were 13 murders reported. Of these offenses 100.0 percent were cleared.

In 38.5 percent of the cases the victim was 25-29 years old. 69.2 percent were male, and 76.9 percent of the victims were white. A knife was used in five (38.5%) of the murders.

Almost half (46.7%) of the offenders were between the ages of 20 to 29 years old. Thirteen (86.7%) were male and 73.3 percent were white. The circumstance in 92.3 percent of the murders was a single victim/single offender and 38.5 percent were family related.

A Supplementary Homicide report is submitted by the participating law enforcement agencies in all murder cases. The report provided pertinent information including the age, sex, and race of the victim and offender(s), and any circumstances which led to the commission of the crime. Beginning January 1, 1988 the requirement for the collection of ethnic origin was discontinued; therefore, the ethnicity of victims and offenders is no longer contained in this report.

Rape

FORCIBLE RAPE:

The carnal knowledge of a female forcibly and against her will. Rapes or attempts accomplished by force or threat of force are classified as forcible regardless of the age of the female victim. In the case that several men attack one female, only one forcible rape is counted. Statutory rape or other sex offenses are not recognized under this category. Sex attacks on males are excluded and classified as assaults or "other sex offenses" depending on the nature of the crime and the extent of injury.

In 1991, there were 272 rapes reported. Of these offenses 54.0 percent were cleared. 9.2 percent of the total rapes reported were attempted forcible rapes.

Juveniles consisted of 14.6 percent of the total arrests made for rape and 36.9 percent of the persons arrested were in their 20's. August had the greatest occurence with 30 rapes reported.

ROBBERY:

The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear. Robbery involves a theft or larceny but is aggravated by the element of force or threat of force.

In 1991, 130 robberies were reported. Of these offenses 41.5 percent were cleared.

Seven bank robberies were reported in 1991 with the highest total amount stolen of $28,639.00. The total amount of property stolen in robberies for 1991 was $75,273.87. June had the most property taken at a value of $13,369 for the month. July had the greatest occurence of robberies with a total of seventeen. The highest average amount stolen ($4,091.29) was from the banks (not including miscellaneous). Strong-arm was used in seventy-seven (59.2%) of the robberies reported in 1991. Supplementary robbery information, such as the location of the robbery, is obtained from the "Property Stolen by Classification Report". Highways, streets, and alleys accounted for 26.9 percent of robbery locations with a total of $3,649.03 of property being lost and an average stolen of $104.26.

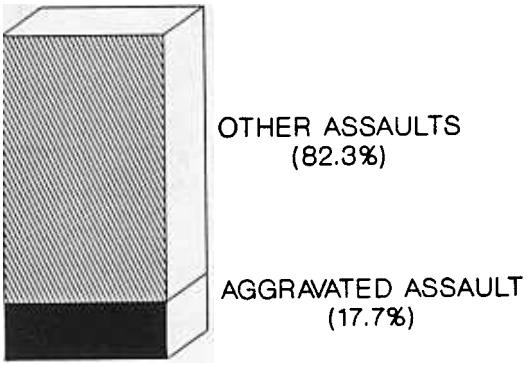
Aggravated Assault

AGGRAVATED ASSAULT:

An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. All assaults by one person upon another with the intent to kill, maim, or inflict severe bodily injury with the use of any dangerous weapon are classified under one of the aggravated assault categories. It is not necessary that injury result from an aggravated assault when a gun, knife, or other weapon is used.



In 1991, there were 818 aggravated assaults reported. Of these offenses 78.4 percent were cleared.

The greatest occurrence of aggravated assaults was in August with ninety-six offenses. Hands, fists, and feet were used in 30.4 percent of the aggravated assaults. There were a total of 3,808 simple assaults reported for 1991. Eighteen percent of the total arrests for aggravated assault were juveniles.

Larceny

LARCENY:

The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Larceny and theft mean the same thing in Uniform Crime Reporting. Motor vehicle theft is not included and is counted separately because of the great volume of thefts in that particular category. All thefts and attempted thefts are counted.

In 1991, there were 15,178 larceny offenses reported. Of these offenses 28.7 percent were cleared.

August had the greatest occurrence with 1,671 offenses. The total amount reported stolen for larceny offenses was $4,352,225.58 with an average loss of $286.75 per larceny. Over one-fourth (26.8%) of the total stolen was taken from motor vehicles with an average loss of $350.96. The highest number of offenses (3,324) were from motor vehicles, also. Property taken from a building had the highest average amount stolen of $466.73. Over half (50.4%) of the total larceny arrests were juveniles.

Motor Vehicle Theft

MOTOR VEHICLE THEFT:

The theft or attempted theft of a motor vehicle. A motor vehicle is defined as a self-propelled vehicle that runs on land surface and not on rails. All automobiles taken by persons not having lawful access even though the vehicles are later abandoned, including a joyride, should be classified in this category.

In 1991, there were 780 motor vehicle thefts totalling $3,612,773. Of these offenses 41.9 percent were cleared.

August had the greatest occurrence with 104 offenses. Of the total value of property stolen, 35.1 percent were locally stolen motor vehicles. Three-fourths (75.8%) of the locally stolen motor vehicles were also recovered locally. Juveniles were arrested for 59.6 percent of the motor vehicle thefts.

ARSON:

Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc. Only fires determined through investigation to have been willfully or maliciously set are to be classified as arsons.

In 1991, there were 135 arson offenses reported with a total property value loss of $330,146. Of these offenses 22.2 percent were cleared.

The greatest occurrence was in the month of July with a total of thirty-six offenses. A total of sixy-eight arson arrests were made with 35.3 percent of the persons arrested being 12 years old and under. Over half (52.6%) of all arsons occurred in a structure with single occupancy/residential being the most common (28.2%) of the structures. The highest total value loss was for single occupancy/residential structures with a total of $133,480. Of those arrested, over sixty-nine percent were juveniles.

ARRESTS:

The total arrests submitted by the agencies in 1991 were 41,220. The greatest number of arrests (10.7%) occurred in August. The Uniform Crime Reporting Program offenses are divided into two groupings - Part I and Part II offenses, and it is as important and essential to maintain uniformity in the data collection of persons arrested as it is in the offense data collection conducted for Part I crimes only. The Part II offenses encompass all other crime classifications outside those defined as Part I offenses. The Part I offenses include: Criminal Homicide, Forcible Rape, Robbery, Aggravated Assault, Burglary, Larceny, Motor Vehicle Theft, and Arson. Arrests for Part I offenses total 6,313. Larceny had the greatest total arrest rate (11.1%) for Part I offenses. Of the total arrests in the Part II offenses, 19.9 percent were made for liquor laws. Only 2.2 percent of the total arrests made in 1991 were drug abuse related.

The 25-29 year old age group had the highest total arrest rate (13.1%). Over three-fourths (76.0%) of the total arrests made were male and 74.8 percent were white. Females were more likely to be arrested for prostitution, vagrancy, or juvenile run-aways apprehended.

Law Enforcement Officers Assaulted

LAW ENFORCEMENT OFFICERS ASSAULTED:

In 1991, there were seventy-one assaults on law enforcement officers reported. Of those assaulted, there were over one-fourth (26.8%) that received injuries. Disturbance calls (family quarrels, etc.) had the greatest occurrence (38.0%) in the type of activity involved with the assault of a law enforcement officer. One hundred percent of the total assaults reported were cleared. Most assaults (22.5%) occurred between the hours of 12:01 AM-2:00 AM. The most common type of assignment consisted of a one officer vehicle that was assisted. Almost half (47.9%) of the assaults happened with this circumstance. Hands, fists, and feet are most commonly used (73.7%) in the assaults that result in an injury. The same was true in 69.2 percent of the cases where there was no injury involved in the assault.

(29) Runaways (Juveniles): Apprehensions for protective custody as defined by local statute. Do not include protective custody actions with respect to runaways taken for other jurisdictions.

Juvenile Arrests:

For purposes of Uniform Crime Reporting, a juvenile should be counted as "arrested" when the circumstances are such that if he or she were an adult, an arrest would be tallied. Arrests should not be scored in cases of:

1. police "contacts" with juveniles where no offense was committed;
2. juveniles taken into custody for their own protection but no crime was committed (e.g., neglect cases).

Hierarchy Rule:

Locate the offense that is highest on the Part I offense list, score that offense, and ignore the other offenses involved in the incident. Counting only the highest offense on the list and ignoring all others, applies only to crime reporting and does not affect the number of charges for which the defendant may be prosecuted in the courts. An exception to the rule is arson.

Unfounded Complaints:

A complaint which is determined through investigation to be false or baseless. If the investigation shows that no offense occurred nor was attempted, the reported offense can be unfounded for Uniform Crime Reporting purposes. The findings of a coroner, court, jury, or prosecutor do not unfound offenses or attempts which law enforcement investigations establish to be legitimate.

Clearances by Arrest:

An offense is "cleared by arrest" or solved for crime reporting purposes when at least one person is:

1. arrested;
2. charged with the commission of the offense; and
3. turned over to the court for prosecution (whether following arrest, court summons, or police notice). Although no physical arrest is made, a clearance by arrest can be claimed when the offender is a person under 18 years of age and is cited to appear in juvenile court or before other juvenile authorities.

Several crimes may be cleared by the arrest of one person, or the arrest of many persons may clear only one crime.

Exceptional Clearances:

If the following questions can all be answered "yes," the offense can then be cleared "exceptionally" for crime reporting purposes:

1. Has the investigation definitely established the identity of the offender?
2. Is there enough information to support an arrest, charge, and turning over to the court for prosecution?
3. Is the exact location of the offender known so that the subject could be taken into custody now?
4. Is there some reason outside law enforcement control that precludes arresting, charging, and prosecuting the offender?
